Proxify - Suggestion Report

Overview

This document provides suggestions and recommendations for improving the functionality, usability, and security of different modules of the **Proxify** platform. The suggestions are based on manual testing observations.

1. Login Page

Observations:

- ❖ No error message displayed for incorrect credentials.
- ❖ No password visibility toggle available.
- ❖ No CAPTCHA verification to prevent brute-force attacks.
- ❖ Session timeout not implemented.

Suggestions:

- ❖ Implement an appropriate error message for incorrect credentials.
- ❖ Add a password visibility toggle option.
- ❖ Integrate CAPTCHA for additional security.
- ❖ Implement a session timeout feature to log out inactive users.

2. Signup Page

Observations:

- ❖ Weak password can be set without validation.
- ❖ No email verification step.
- ❖ No indication of password strength.

Suggestions:

- ❖ Enforce strong password requirements.
- ❖ Implement email verification before allowing login.
- ❖ Display password strength indicator.

3. Dashboard Page

Observations:

- ❖ User balance is not auto-updating after transactions.
- ❖ No logout button available on the dashboard.
- ❖ No real-time notifications for account activity.

Suggestions:

- ❖ Implement automatic balance updates.
- ❖ Add a logout button for user convenience.
- ❖ Introduce real-time notifications for transactions and activities.

4. Plans Page

Observations:

- ❖ No comparison view between different plans.
- ❖ No filter or sorting options available.
- ❖ No details about refund or cancellation policies.

Suggestions:

- ❖ Provide a side-by-side plan comparison feature.
- ❖ Add sorting and filtering options.
- ❖ Display refund and cancellation policies clearly.

5. Invoice Page

Observations:

- ❖ No option to download invoices.
- ❖ No sorting or filtering options available.
- ❖ No invoice preview before downloading.

Suggestions:

- ❖ Add a download button for invoices.
- ❖ Implement sorting and filtering functionalities.
- ❖ Provide an invoice preview feature before downloading.

6. Top-up Page

Observations:

- ❖ Only one payment method (Cryptomus) is available.
- ❖ No confirmation prompt before payment processing.
- ❖ No estimated processing time mentioned.

Suggestions:

- ❖ Add multiple payment options for user convenience.
- ❖ Implement a confirmation popup before processing payments.
- ❖ Display estimated processing time for transactions.

7. Referral Page

Observations:

- ❖ No indication of referral commission percentage.
- ❖ No tracking system for referred users.
- ❖ No automated notification for referral earnings.

Suggestions:

- ❖ Clearly mention the commission percentage on the referral page.
- ❖ Implement a system to track referred users and their transactions.
- ❖ Send automated notifications when referral earnings are credited.
